

- The **ProSeries Point of Use Drinking Water System** tucks neatly under your sink and dispenses a constant supply of delicious water to the faucet installed to your sink. Forget the daily cost of bottled water. Thanks to this filter, your coffee, tea and juice will be more flavorful. And the food you prepare – like soups, sauces, fresh fruits and vegetables – will taste better. In addition, our drinking water system gives you a constant supply of water and the fast recovery system refills your tank quickly, producing enough water for all of your needs.
- The heart of the system is a highly compressed carbon block filter made of selected activated carbons to reduce tastes and odors, and aesthetic chlorine. Up to 500* gallons of drinking water can be produced before the cartridge needs replacement. And when a cartridge change is required, all it takes is a quick turn of the filter body locking ring. No tools are required.

The **ProSeries Point of Use Drinking Water System** effectively reduces:

- **Bad tastes and odors**
- **Dirt and rust**
- **Aesthetic chlorine**
- **Contaminants down to .5 micron. As a reference, the diameter of an average human hair is 100 microns. The size of cysts and viruses are .5 microns.**

A Better Solution For
The Best Water Possible.

SYSTEM FEATURES:

Compact unit installs conveniently under your sink or the ice maker

Rugged stainless steel housing

Dual filtration carbon block filter provides a constant supply of highly filtered drinking water

RESIDENTIAL APPLICATIONS:

- Drinking water
- Ice cubes
- Baby formulas
- Cooking water
- Soups and sauces
- Juices, coffee and tea
- Plants
- Pets

HOW IT WORKS:

Step 1: Cold water enters the system.

Step 2: Water is forced through the tightly compressed activated carbon block filter that has a porosity of only .5 micron.

Step 3: Unwanted substances are trapped and filtered out.

Step 4: Water leaves the filter and flows through the system's faucet, providing you with an abundant supply of crystal clear, delicious water for both drinking and cooking.

*500 gallons for model 38247, faucet included

ProSystems model 38247 has been tested and certified by NSF International against NSF/ANSI 42 and 53 for the reduction of claims specified on the Performance Data Sheet.
