

- The **ProSeries Whole House Water Filters** use Granular Activated Carbon (GAC) to effectively filter impurities from your water. Its programmable computer controlled valve allows your service provider to program the backflush cycle for maximum efficiency based on your water usage. The computer in the head stores data that can be monitored to determine if the cycle should be altered or if the carbon needs to be replaced.

BENEFITS

- Effective, Efficient and Eco-Friendly
- Cleaner, better tasting water from every tap, faucet and shower
- More cost-effective and convenient than bottled water
- Increases the life of your plumbing, fixtures and water using appliances
- Reducing the chlorine or chloramines and disinfectant by-products, reduce chlorine smell.
- When the water tastes great, you'll drink more water and that's good for your health

ECO-FRIENDLY FACTORS

- No more bottled water waste
- Uses 1/10 the energy required for a water cooler
- Carbon has been found to reduce volatile organic compounds (VOCs)

The Smart, Economical Way To
Enjoy The Best Water Possible.

ProSystems®

HOW IT WORKS:

Step 1: The filter is installed between the main water line and the interior pipes.

Step 2: Water enters the filter where it passes through the granulated activated carbon (GAC), and impurities are reduced.

Step 3: Water then passes out of the filter and into your home, providing clean great tasting water from every tap.

Step 4: Based on the preset backflush cycle, the filter will clean itself of dirt, freshening the carbon bed to create more surface space for maximum effectiveness.

The ProSeries whole house carbon filters are tested and certified by WQA against ORD0902 for California "lead free" compliance.
The ProSeries whole house carbon filters are tested and certified by WQA against NSF/ANSI 61 for material requirements only.

CALIFORNIA RESIDENTS: California Residents: Water treatment devices sold to retail consumers in California accompanied by certain health claims must be certified by the California Department of Public Health. The ProSeries Whole House Water Filters are not certified by the State of California for the purpose of making health claims.

Benefits will be provided by various types of ProSeries equipment when installed and operated according to manufacturer's recommendations. Operational, maintenance and replacement requirements are essential for the product to perform as advertised. All claims based on best available information at time of printing. Manufacturer makes no representations as to the suitability of this equipment for a particular application. Buyer relies entirely on dealer's recommendations in the purchase of this equipment. Independent dealers may include, together with your ProSeries product, a product or component that is not manufactured by Aquion, Inc. Any non-ProSeries product may be covered by the manufacturer of that product, and is not covered by the ProSeries warranty. Aquion, Inc. does not warrant that your ProSeries product and the non-ProSeries product will perform properly when used together, and assumes no liability therefore.
